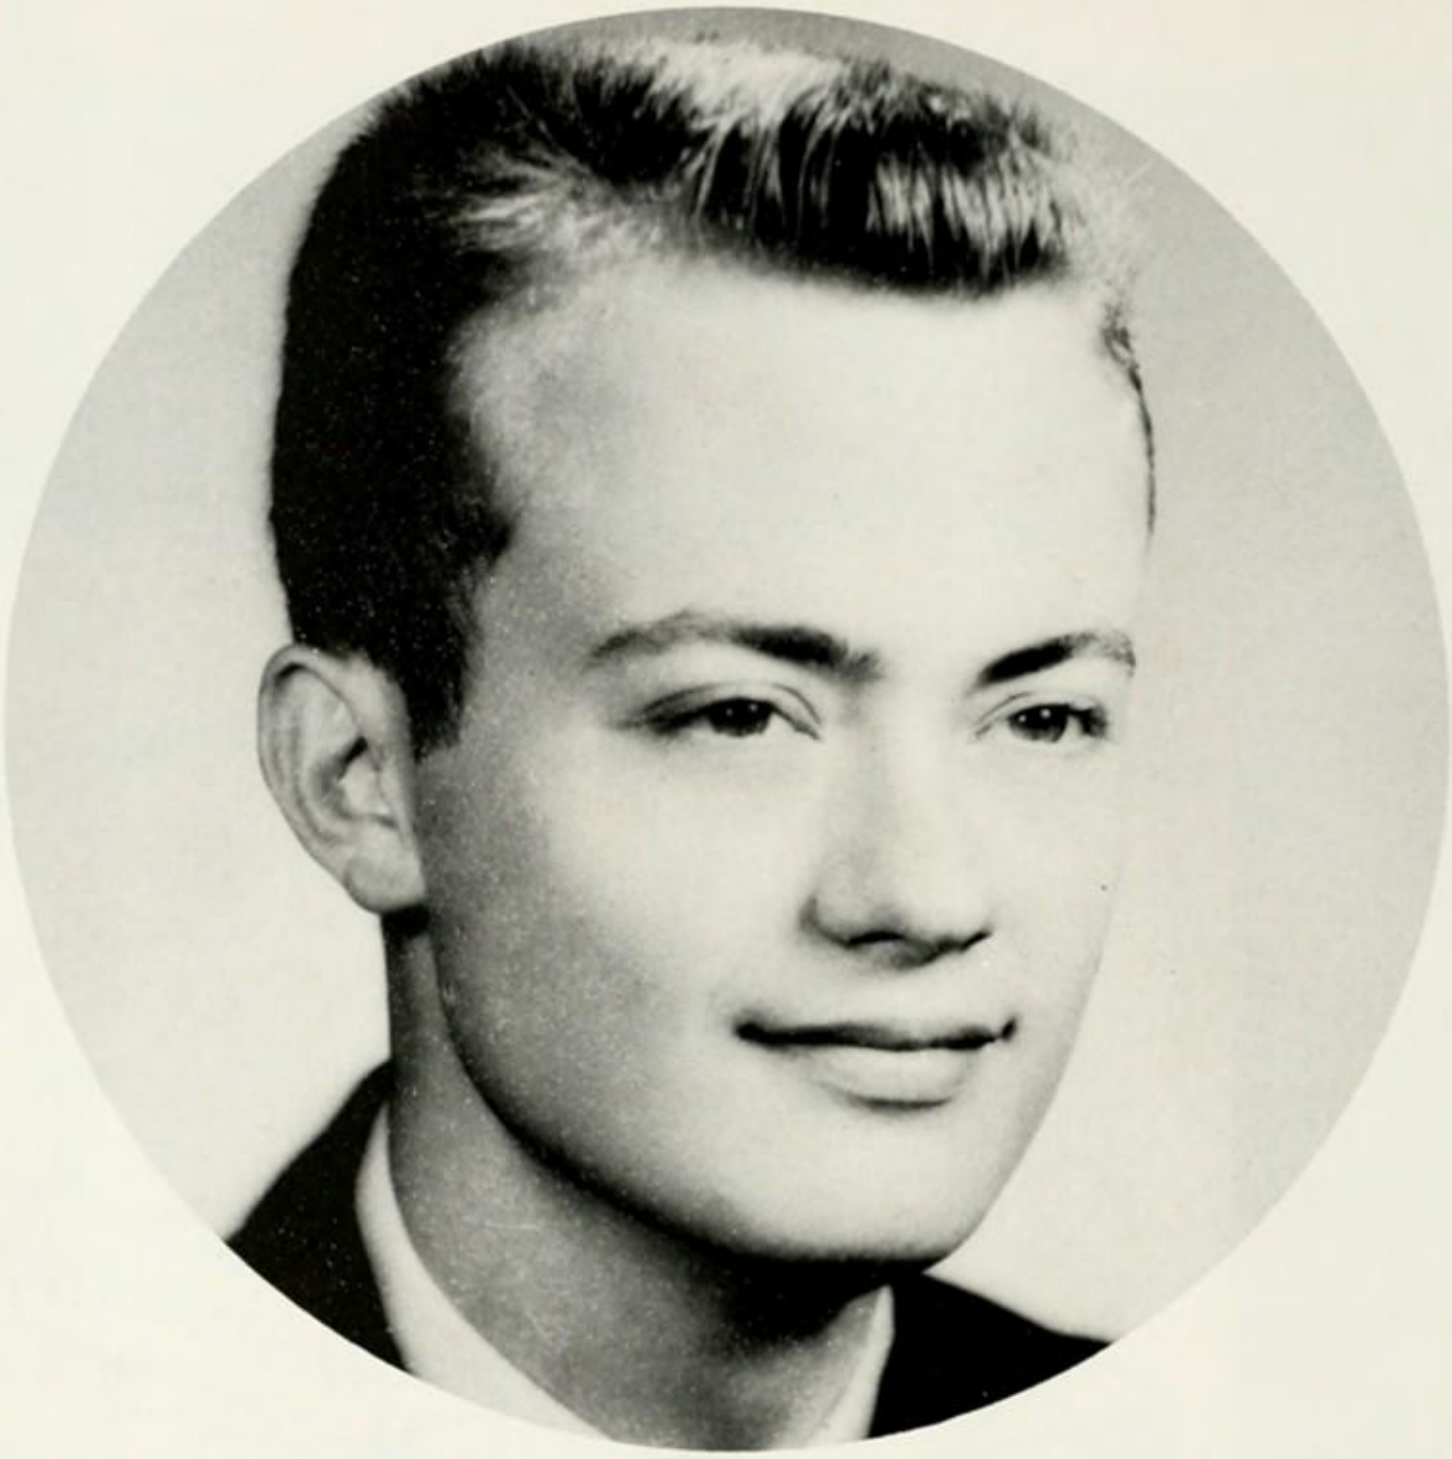
Piratie



The volume you hold in your hand is unique because it represents one year at Winfield High. We hope you enjoy it as much as the annual staff enjoyed putting it together.

We hope you will always treasure this year's Pirate. May it help bring back the many wonderful days we spent together at our Alma Mater.

WORK

There is no way in the world by which you can get something for nothing. It can be made to appear otherwise. But there is no way of escaping the final truth. It requires just plain common sense, which nowadays has become uncommon, to figure out that everything in the world comes from somewhere, and goes somewhere, and there is always a reason for its coming and going.

Life always balances its books and demands its price. The clothes you are wearing today are where they are because your father gave up something else to somebody else in exchange. The something else will usually be a certain number of hours of your work.

Work is the currency of our economic life - everything we have of a material nature can be measured in hours of work. Even a thief has to put in hours of hard work for what he gets.

All of us dream of a life of ease and comfort. If we didn't we would not be human. But this dream of an easy life is a very expensive dream. It costs us a lot of time and trouble that we could not otherwise have to go through.

I wish that there were some way to supply everyone with a decent living without requiring of them a full day's work. This law was laid down by mother nature, and there isn't anything that anybody can do to change it.

We, in America, live better because we do more work - because we produce more of the good things that make life better.

Every generation can always find politicians who are eager to put everyone on easy street. They promise something for nothing. But in the sense I'm using the work today, work pays off in dollars and cents - in more prosperity and better living.

EARNEST H. MOSS
Principal

For the past twenty years (fifth of a Century) I have had the privilege of working with some of the finest teachers, students, and parents a person could ever hope for.

During this period my fields of endeavor included Social Studies, Science, English, Mathematics, Bookkeeping, Guidance, Assistant Principal, and for the past seven years Principal.

I can see success in some of the things I have attempted, however, I can see failure in many others. My past efforts were always motivated by a sincerity of purpose to provide quality education for all the boys and girls "irrespective".

Consider the Time

It is a time for initiative---because great values are in balance, changes are being made rapidly in the field of education and more are coming. It is a time to join in planning--to bring your experiences and views to bear, along with those of your neighbors, on the changes in education, and the establishment of the educational goals in your own school and state. It is time to become involved---because inaction is usually an evidence of fear or apathy and neither is creditable to a man of honor or a servant of God.

May we all remember and cherish the challenges, accomplishments, and above all, the friends at Winfield High School.
